Quality	Copper: 87.5%; Nickel: 12.5%
Weight	4.8 g
Diameter	22.6 mm
Other features	Helical ridges, etc.
Number of coins issued	3,948,000 of each
Scheduled time of exchange (Exchange at financial institutions)	Around July 2019 * The date to start exchange will be announced by the Ministry of Finance around June 2019.

(Note 1) Since the 1,000-yen silver coins using precious metals are crafted with special technologies, the cost required to manufacture them exceeds their face values, which make them premium-grade commemorative coins.

(Note 2) The latent images are different for the Olympic Games Tokyo 2020 1,000-yen commemorative silver coin and the Tokyo 2020 Paralympic Games 1,000-yen commemorative silver coin. See the Attachments (References 1 to 3 and 9) for details.

(Note 3) Regarding the helical ridges on the edges of the 100-yen clad coins, while the Tokyo 2020 Paralympic Games commemorative coin has wide-spaced ridges, the Olympic Games Tokyo 2020 has narrow-spaced ridges so that they can be distinguished also by touching their edges.

(Note 4) The 100-yen clad coins are circulated by being exchanged at their face value over the counter at financial institutions.
