Chapter 4 Debt Management in Foreign Countries

Debt Management Policies in Foreign Countries

(1) Debt Management Policy Frameworks

In Japan, the basic objectives of the debt management policy are set as: (1) To ensure the smooth and secure issuance of Japanese Government Bonds and (2) To minimize medium- to long-term fundraising costs. In line with these objectives, the government carefully communicates with the markets and makes efforts to manage JGBs based on investor needs and market trends. Basically, foreign countries also take almost the same stance on their debt management policies, but they have their own unique characteristics.

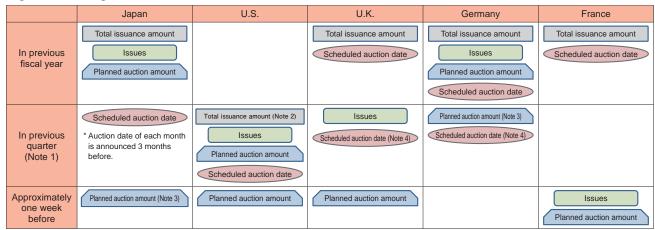

Furthermore, the JGB Issuance Plan is established in line with annual budget formulation, and an annual planned issuance amount for each maturity and other data are published in Japan, but methods for publishing such data also vary from country to country. At the end of each fiscal year, Germany publishes the total government bond issuance amount and its breakdown by maturity for the following fiscal year. This method is considered to be similar to that of Japan. On the other hand, the U.S. determines and publishes necessary issuance amount not on a fiscal year basis but on a quarterly basis, complying with the debt limit specified by law. In addition, the timing of information disclosure from the announcement of a planned issuance amount to an actual auction for the issue also varies (Figs. 2-39 and 2-40).

		Japan	U.S.	U.K.	Germany	France
	Debt Management Office	Financial Bureau, Ministry of Finance	Department of the Treasury, Office of Debt Management Department of the Treasury, Bureau of the Fiscal Service	HM Treasury, United Kingdom Debt Management Office (DMO)	Bundesministerium der Finanzen, Bundesrepublik Deutschland - Finanzagentur GmbH (German Finance Agency)	Ministère de l'Économie, des Finances et de la Souveraineté industrielle et numérique, Direction générale du Trésor, Agence France Trésor (AFT)
-	The Objective of Debt Management Policy	To ensure the smooth and secure issuance of Japanese Government Bonds To minimize medium- to long-term fundraising costs	 To finance government borrowing needs at the least cost over time To conduct auctions in a regular and predictable manner 	To minimize, over the long term, the costs of meeting the government's financing needs, taking into account risk, while ensuring that debt management policy is consistent with the aims of monetary policy	To keep the interest costs for the loans taken out as low as possible over many years and different market phases and at the same time, to limit the interest rate risks resulting from the debt structure	To raise sufficient funds on the markets to finance the State under optimum conditions of security while keeping the debt servicing cost for taxpayers down to a minimum
	Fiscal Year	April to March of the following year	October previous year to September	April to March of the following year	January to December	January to December
	Issuance Plan	Announcement of total JGB issuance amount for the following fiscal year, breakdowns by maturity, and frequency of issuance, etc. in late- December each year (This can be changed based on discussions with market participants in response to market circumstances and issuance conditions.)	Announcement of planned issuance amount by maturity, auction schedule, etc., on a quarterly basis (primarily at the beginning of February, May, August, and November, or at the end of the previous month)	 Announcement of total issuance amount for the following fiscal year, breakdowns by maturity, etc. in March each year Announcement of specific details of issues and auction schedule on a quarterly basis 	 Announcement of planned issuance amount by maturity, auction schedule, new issue/reopening, etc. for the following fiscal year in December each year Announcement of auction schedule again on a quarterly basis 	 Announcement of total issuance amount for the following fiscal year in December each year Specific issuance amount is determined based on a meeting with PD held in the week preceding the issuance date and on the auction status on the issuance date.

Fig. 2-39 Debt Management Policies

(Sources) Websites of the respective countries' debt management authorities

Note 1: Total issuance amount, issues, planned auction amount, and scheduled auction date in the U.S. are announced at the end of the previous guarter or the beginning of the current quarter.

Note 2: Planned guarterly amount financed from the market.

Note 3: After announcing the planned issuance lots per auction in the previous fiscal year, the fixed amount is announced one week before in Japan and every quarter in Germany

Note 4: Scheduled auction date is announced again every guarter.

(2) Bond Types and Issuance Methods

Government bonds adopted in various foreign countries are broadly classified into two types: bonds that can be bought and sold in the secondary market (marketable bonds) and bonds that are difficult to trade in the secondary market, such as government bonds offering to retail investors (non-marketable bonds).

Marketable bonds are normally offered mainly through the public auction method, which uses both competitive and non-competitive auctions. In the case of competitive auctions, it should be noted that the U.K., Germany and France employ the multiple price/yield (conventional) method ((()) for almost all maturities, as is the case for Japan, while the U.S. employs the single price/yield (Dutch-style) method (@2) for all maturities. In addition, the U.K. and France use the syndication method. Germany used the syndication method in 2020 for the first time in five years and has continued to use it after 2021.

each winning bidder purchases the security at one's bidding price (or yield).

2 Auction method by which all winning bidders pay the lowest accepted bid price regardless of their original bid prices (or vields).

	Japan	U.S.	U.K.	Germany	France
Short-term (Discount bonds)	3-Month, 6-Month, 1-Year	4-Week, 6-Week, 8-Week, 13-Week, 17-Week, 26-Week, 52-Week, CMB (Note 2)	1-Month, 3-Month, 6-Month, 12-Month (Note 3)	3-Month, 5-Month, 6-Month, 9-Month, 11-Month, 12-Month	Less than or equal to 1-Year
Medium-term	2-Year, 5-Year	2-Year, 3-Year, 5-Year, 7-Year	Over 2 ~ 7-Year	2-Year, 5-Year, 7-Year (Note 4)	2 ~ 8.5-Year
Long-term	10-Year	10-Year	Over 7 ~15-Year	10-Year	0
Super long-term	20-Year, 30-Year, 40-Year	20-Year, 30-Year (Note 4)	Over 15 ~ 55-Year	15-Year, 30-Year (Note 4)	Over 8.5 ~ 50-Year
Others	 Inflation-Indexed Bonds (10-Year) Japan Climate Transition Bonds (5-Year, 10-Year) 	 Inflation-Indexed Bonds (5-Year, 10-Year, 30-Year) Floating-Rate Bonds (2-Year) 	 Inflation-Indexed Bonds (5 ~ 55-Year) Green Bonds (12-Year, 32-Year) 	 Inflation-Indexed Bonds (5-Year, 10-Year, 30-Year) (Note 5) Green Bonds (5-Year, 10-Year, 30-Year) 	 Inflation-Indexed Bonds (2 ~ 50-Year) Green Bonds (16-Year, 22-Year, 23-Year, 25-Year) (Note 6)
Issuance Method	Multiple price/yield (conventional) method (40-Year, Inflation- Indexed Bonds, and Japan Climate Transition Bonds: single price/yield (Dutch-style) method)	Single price/yield (Dutch-style) method	Multiple price/yield (conventional) method (Inflation-Indexed Bonds: single price/yield (Dutch-style) method) (Note 7)	Multiple price/yield (conventional) method (Note 7)	Multiple price/yield (conventional) method (Note 7)

Fig. 2-41 Marketable Bond Types and Issuance Methods

Note 1: As of the end of March 2025.

Note 2: CMBs (Cash Management Bills) are issued according to short-term financing needs.

Note 3: Information for regular weekly issuances. 12-month issues are institutionally made available for issuance but have never been issued.

Note 4: The U.S. issued a 20-year bond in May 2020 for the first time in 34 years since 1986. Germany issued 7-year and 15-year bonds in May 2020 for the first time ever. Note 5: In November 2023, the Federal government announced that from 2024, no further Inflation-Indexed Bonds would be issued (including reopening issuances). Note 6: In May 2022, France issued green bonds with the characteristics of Inflation-Indexed Bonds.

Note 7: The U.K., Germany and France use syndication for issuing some bonds.

(Sources) Websites of the respective countries' debt management authorities, etc.

Representative non-marketable bonds are bonds for holdings only by households and other retail investors (savings bonds), issued in Japan, the U.S. and the U.K. The U.K. features unique non-marketable bonds, including "Premium Bonds" which offer a monthly prize draw instead of earning interest, as well as "Green Savings Bonds" which are green bonds issued for retail investors. Germany and France issued government bonds for retail investors in the past but have discontinued the issuance.

The U.K. and France are characterized by issuing coupon-bearing marketable government bonds with flexible maturities set in rough ranges instead of setting specific maturities.

The U.S. issues a large amount of non-marketable bonds intended for government accounts including government entities and pension funds, which account for about 20% of its entire government debt outstanding.

Ref: Chapter 1 2 (2) B "JGBs and sales system for Retail Investors" (P60)

(Reference) Green Bonds

Green bonds in Fig. 2-41 are issued by business corporations, local governments and other entities to raise funds for renewable energy and other projects that contribute to resolving global warming and other environmental problems. The global green bond market, including Japanese issues, has grown at the initiative of the private sector.

Outside of Japan, sovereign green bonds have been issued in 36 countries (as of the end of March 2025), including France, Germany and other European countries, since Poland became the first country to issue such bonds in 2016.

(3) Liquidity Maintenance/Enhancement Measures

Countries use various methods to maintain and enhance the liquidity of government bond markets. In Japan, from the viewpoint of securing market supply of each issue, 20-Year Bonds and 30-Year Bonds are in principle reopened in four issues per year, while 40-Year Bonds and Inflation-Indexed Bonds are in principle reopened in one issue per year. 5-Year Bonds are reopened unless the gap between the coupon rate of the issue with the same maturity and the market interest rate on the auction day is more than 0.10%, and 10-Year Bonds are reopened unless the gap between the coupon rate of the issue with the same maturity and the market interest rate on the auction day is more than 0.10%, such as the trace of the auction day is more than 0.30%. Through Liquidity Enhancement Auctions, Japan also reopens issues that have structural liquidity shortages or temporary liquidity shortages caused by expanding demand.

Among foreign countries, the U.S. and Germany have basically adopted reopening for on-the-run issues. In the U.K. and France, the debt management authorities discretionarily reopen any issues whether they are on- or off-the-run (Fig. 2-42).

In Germany, meanwhile, the authority withholds a certain nominal volume at each auction and gradually releases to the secondary market or uses them for the repo market in consideration of market conditions.

	Japan (Note 1)	U.S.	U.K.(Note 2)	Germany (Note 2, 3)	France (Note 2)
	 5-Year (Note 4) 	·10-Year	 Medium-term 	·2-Year	 Medium-term

(4) Primary Dealer System

Primary dealers (PDs) originally referred to government-certified dealers in the U.S. Candidates for PD designation are examined beforehand for their market-making capabilities, financial conditions, government bonds auction participation records, etc. Companies designated as PDs are entitled to directly trade with the Federal Reserve Bank of New York when the Federal Reserve conducts open market operations and to participate in periodic meetings with the authorities for the exchange of opinions. At the same time, they are obliged to bid for government bonds in auctions, to conduct market-making services, and to provide information to the authorities. In this way, companies with special qualifications and responsibilities in regard to government bond markets are designated as PDs to ensure that government bond market liquidity, efficiency, and stability are maintained and improved. Such a system is generally called the PD system. Nowadays, various countries have similar PD systems, including Japan's JGB Market Special Participants Scheme. But PDs' responsibilities and qualifications vary from country to country as shown below (Fig. 2-43).

		Japan	U.S.	U.K.	Germany (Note 1)	France
	Name	JGB Market Special Participants	Primary Dealers	Gilt-edged Market Makers (GEMMs)	Bietergruppe Bundesemissionen (Bund Issues Auction Group)	Spécialistes en Valeurs du Trésor (SVTs)
Introduction time		2004	1960	1986	1998	1987
Number of members (as of April 2025)		19 companies	25 companies	18 companies	33 companies	15 companies
	Bidding	Participation in all auctions At least 100/n% of the planned issuance amount "n" refers to the number of JGB Market Special Participants.	Participation in all auctions Issuance amount /the number of PDs	Participation in all auctions •5% or more of total issuance amount on a 6-month rolling average basis	_	Participation in all auctions
Responsibilities	Purchasing	<short-term> 0.5% or more of total issuance amount for the preceding two quarters <excluding short-term=""> 1% or more of total issuance amount for the preceding two quarters</excluding></short-term>	_	2% or more of total issuance amount of each sector, conventional and index-linked, on a 6-month rolling average basis	0.05% or more of total issuance amount for a year, weighted according to maturity	2% or more of total issuance amount of each sector (short- term, medium-term, long-term and super long-term and Inflation- Indexed Bonds) on a rolling 12-month average basis (Note 2)
	Market making	Providing sufficient liquidity to the JGB secondary market	Maintaining a share of Treasury market making activity of at least 0.25%	Maintaining an individual secondary market share of at least 2% on a 6-month rolling average basis	_	Maintaining a 2% or more share in the secondary market
	Information provision	Report to the MOF	Report to the New York Fed	Report to the DMO	_	Report to the AFT
Qualifications	Exclusive participation in auction	Non-Price Competitive Auction I (Up to 25% of planned issuance amount) Non-Price Competitive Auction II (Up to 10% of total amount of bids accepted in the competitive auction and Non-Price Competitive Auction I) Liquidity Enhancement Auction Buy-back Auction, etc.	• Buy-back Auction (Note 3)	Competitive Auctions Syndication, etc.	Competitive Auctions Non-Competitive Auctions	Competitive Auctions Non-Competitive Auctions Syndication, etc.
	Regular meeting, etc.	Meeting with the MOF (About 5 times a year)	 Meeting with the U.S. Department of the Treasury (quarterly) Meeting with the New York Fed (annually) 	Meeting with the DMO (quarterly / annually) Meeting with the HM Treasury (annually)	_	Meeting with the AFT (periodically)

Fig. 2-43 Primary Dealer System

Note 1: Germany's "Bund Issues Auction Group" is similar to the primary dealer system in other countries in that only the group members are allowed to participate in government bond auctions. However, the only requirement for a Bund Issues Auction Group member is a registered office in a member state of the European Union, the European Economic Area or Switzerland, though required to purchase a certain part of each issue. Bund Issues Auction Group members are free from any obligation to make bids in auctions, and they don't have meetings with authorities periodically. Therefore, Bund Issues Auction Group is viewed as different from the PD system in other countries.

Note 2: Conditions other than that in the table for France's purchasing responsibilities include "2% or more of total issuance amount on a rolling 12-month average basis for three of four sectors (short-term, medium-term, long-term and super long-term and Inflation-Indexed Bonds) and the average for the four sectors at 3% or more of total issuance amount on a rolling 12-month average basis."

Note 3: As of April 2025. U.S. Department of the Treasury anticipates considering whether to allow other counterparties besides the PDs to directly participate in the future (Sources) Websites of the respective countries' debt management authorities, etc.
