Note.1: Figures may not sum up to the total because of rounding.

Note.2: Issuance Amount is calculated on a revenue basis, up to FY2023; actual, FY2024; supplementary budget, FY2025; initial

The figures in ( ) indicate Ad-hoc Special Deficit-Financing Bonds, < > are Tax Cut Special Deficit-Financing Bonds, [ ] are Special Deficit-Financing Bonds for

Note.3: Reconstruction Bonds are issued under the General Account in FY2011 and under the Special Account for Reconstruction from the Great East Japan Earthquake from

Note.3: Reconstruction Bonds are issued under the General Account in FY2011 and under the Special Account for Reconstruction from the Great East Japan Earthquake from FY2012 onward.

Note.4: The figure of Special Deficit-Financing Bonds in FY1965 includes Revenue Supplementary Bonds issued at the time of supplementary budget for reasons of expediency.

Note.5: Bond Dependency Ratio is the issuance amount of (Construction Bonds+Special Deficit-Financing Bonds)/general account total, up to FY2023; actual, FY2024; supplementary budget, FY2025; initial.

This calculation excludes "bonds issued as bridging finance," for which redemption resources are secured separately through the establishment of special taxes, etc.

Note.6: JGB Outstanding at the end of each fiscal year is calculated on a nominal basis, up to FY2023; actual, FY2024; supplementary budget, FY2025; initial.

Note.7: JGB Outstanding/GDP is calculated on a nominal basis, actual GDP for years up to FY2023 and estimated GDP for FY2024 and 2025 in the "Fiscal 2025 Economic Outlook and Basic Stance for Economic and Fiscal Management" (Cabinet Decision on January 24, 2025).

Note.8: National Debt Service and National Debt Service/General Account Total are on an initial budget basis for all years. FY2019 and FY2020 data cover extraordinary and special measures.

Note	: 1: "	Fina	inced with the General A	Account" in the '	Government De	bt Consolidation

Note 1: "Financed with the General Account" in the "Government Debt Consolidation Expenditures" and "Financed with Special Accounts" in the "Reconstruction Bonds Consolidation Expenditures" and "GX Economy Transition Bonds Consolidation Expenditures" include GDCF's original revenue.

Note 2: Figures may not sum up to the total because of rounding.

Note 3: Grants from Pension and Child and Child-rearing Support Accounts in the initial FY2024 budget is reclassified for a comparison with the expense in the initial FY2025

Ш

## (3) Payment Status of Debt Redemption Expenses and Interest, Discount Expenses and so on for Each Account (FY2025 Initial Budget, FY2023 Settlement of Accounts)

The GDCF Special Account centrally conducts accounting for redemption and interest payments for public bonds and borrowings, using fiscal transfers from the General Account and other special accounts.

#### A FY2025 Initial Budget

(Unit: million yen)

	Debt Redemption Expenses	Interest and Discount Expenses	Others	Total	Remarks
s from Other Accounts	72,651,382	12,341,661	26,904	85,019,946	
ant from the General Account	17,669,333	10,522,976	24,796	28,217,106	The redemption and interest of public bonds and borrowings, Treasury Financing Bill discount expenses, etc.

## (9) Government Bond-related Legal Systems

#### A. Legal basis of issuance

All JGBs are issued in accordance with applicable laws. Depending on legal grounds, JGBs are categorized into JGBs (Construction Bonds, Special Deficit-Financing Bonds, Reconstruction Bonds, GX Economy Transition Bonds, Childern Special Bonds, Semiconductors and AI Bonds, Refunding Bonds, and Fiscal Investment and Loan Program (FILP) Bonds), Financing Bills for financing temporary cash shortage of the national treasury, and Subsidy Bonds granted in place of cash payments.

According to Art. 85 of the Japanese Constitution, the Diet approval is necessary when the central government intends to assume new liabilities.

#### a. Public Finance Act, Art. 4 (1), Proviso (Construction Bonds)

Proviso to Art. 4 (1) of the "Public Finance Act" permits, as an exception, the ability to issue bonds and carry out borrowings within amounts that correspond to public works, capital subscriptions, and lending. These expenditures, which are not consumptive, contribute to the asset formation of the state, normally with long-term benefits. Therefore, with regard to this type of expenditure, financial resources can be procured through bond issuance or borrowing, and the understanding is that future generations can be required to share in the burden of debt service.

In other words, Art. 4 (1) of the "Public Finance Act" rests on the concept of an equitable sharing of the financial burden across the generations, and is interpreted to stipulate a principle of sound fiscal policy such that bond issuance and/or borrowing are permitted, limited to public works expenditure, etc.

However, the government can issue Construction Bonds within the amount approved by the Diet, and the ceiling amount is provided under the general provisions of the General Account budget.

Furthermore, Art. 4 (2) provides that when this ceiling amount is put to a parliamentary vote, the government is obliged to submit to the Diet a redemption plan that shows the redemption amount for each fiscal year, the redemption method and the redemption periods.

#### b. Special Law for Special Deficit-Financing Bonds (Special Deficit-Financing Bonds)

A special law for Special Deficit-Financing Bonds legislated in each fiscal year and the "Act on Special Provisions concerning Issuance of Public Bonds to Secure Financial Resources Required for Fiscal Management" provide for "issuance in addition to the government bonds issued pursuant to the proviso of Art. 4 (1) of the Public Finance Act." The purpose of this provision is to limit the issuance of Special Deficit-Financing Bonds to cases where, despite the issuance of Construction Bonds, a revenue shortfall is expected to arise.

These laws provide merely the authority to issue Special Deficit-Financing Bonds, but leave it to the general provisions of the General Account budget to stipulate the specific ceiling amount. The reason for this structure is that the applicable ceilings for the issuance of government bonds each fiscal year are decided within the balance of total income and expenditure for the fiscal year in question. In this sense, since the ceiling amount for JGBs is inseparably linked to budgeted income and expenditure, it is considered most appropriate to have these matters stipulated in the general provisions of the General Account budget and to hold a parliamentary debate and obtain a decision as part of wider income and expenditure considerations.

Moreover, as with Construction Bonds, when the issuance ceiling for Special Deficit-Financing Bonds requires Diet approval, a redemption plan must be submitted to the Diet for reference during the deliberations.

Issuance of Special Deficit-Financing Bonds is an exceptional measure. Actual issuance can be within the amount approved by the Diet, must be made with consideration for the state of income sources such as tax revenues, and must be kept as low as possible. In this context, the government is allowed to issue Special Deficit-Financing Bonds even during the accounting adjustment term. Specifically, the government is allowed to issue Special Deficit-Financing Bonds until the end of June in the next fiscal year, in order to adjust the issuance amount of Special Deficit-Financing Bonds until the end of May in the next fiscal year: the deadline for collecting the tax revenue for the fiscal year.

In addition, the government must strive to expeditiously reduce Special Deficit-Financing Bonds.

## c. Act on Special Measures concerning the securing of financial resources to execute measures necessary for recovery from the Great East Japan Earthquake, Art. 69 (1) and (4) (Reconstruction Bonds)

Reconstruction Bonds are government bonds issued pursuant to Art. 69 (1) and (4) of the "Act on Special Measures concerning the securing of financial resources to execute measures necessary for recovery from the Great East Japan Earthquake." These bonds are issued from FY 2011 to FY 2025 as bridging finance to secure funding for measures related to cover reconstruction from the Great East Japan Earthquake. Reconstruction Bonds were issued as a General Account item in FY2011, but the government issued these bonds under the Special Account for Reconstruction from the Great East Japan Earthquake from FY2012 onward.

The issuance of Reconstruction Bonds is permitted within the amount approved by the National Diet, similar to Construction Bonds or Special Deficit-Financing Bonds. Their issuance cap is stipulated in the general provisions of the General Account budget with regard to FY2011 and in the general provisions of the Special Account budget with regard to FY2012 onwards. In addition, similar to Special Deficit-Financing Bonds, there is a system in place for the issuance of bonds in the accounting adjustment term.

Furthermore, regarding Reconstruction Bonds, including their Refunding Bonds, it is stipulated that they will be redeemed by revenues generated from the Special Taxes for Reconstruction, etc. from FY2012 to FY2037, up to FY 2037.

### d. Act on Promoting Transition to the Decarbonized Growth Economic Structure, Art. 7 (1) (GX Economy **Transition Bonds**)

GX Economy Transition Bonds are government bonds issued pursuant to Art. 7 (1) of the "Act on Promoting Transition to the Decarbonized Growth Economic Structure" to support upfront investment toward the realization of the "Strategy to Promote Transition to the Decarbonized Growth Economic Structure." These bonds are issued from FY 2023 to FY 2032 as bridging finance, which amount to approximately 20 trillion yen.

The issuance of GX Economy Transition Bonds is permitted within the amount approved by the National Diet, similar to Construction Bonds or Special Deficit-Financing Bonds. Their issuance cap is stipulated in the general provisions of the Special Account budget. In addition, similar to Special Deficit-Financing Bonds, there is a system in place for the issuance of bonds in the accounting adjustment term.

Furthermore, regarding GX Economy Transition Bonds, including their Refunding Bonds, it is stipulated that they will be redeemed by revenues from GX-Surcharge (Surcharge on fossil fuel supply) for companies such as fossil fuel importers and GX-ETS (Emissions Trading System), up to FY 2050.

#### e. Child and Child Care Support Act, Art. 71-26 (1) (Children Special Bonds)

Children Special Bonds are government bonds issued pursuant to Art. 71-26 (1) of the "Child and Child Care Support Act." These bonds are issued from FY 2024 to FY 2028 as bridging finance for strengthening Policies supporting children and child-rearing radically until stable financial resources will be secured.

The issuance of Children Special Bonds is permitted within the amount approved by the National Diet, similar to Construction Bonds or Special Deficit-Financing Bonds. Their issuance cap is stipulated in the general provisions of the Special Account budget. In addition, similar to Special Deficit-Financing Bonds, there is a system in place for the issuance of bonds in the accounting adjustment term.

Furthermore, regarding Children Special Bonds, including their Refunding Bonds, it is stipulated that they will be redeemed by Child and Child-rearing Support Levy, up to FY 2051.

#### f. Act on Facilitation of Information Processing, Art. 69 (1) (Semiconductors and AI Bonds)

Semiconductors and AI bonds are government bonds issued pursuant to Art. 69 (1) of the "Act on Facilitation of Information Processing." These bonds will be issued from FY 2025 to FY 2030 as bridging finance to secure funding for measures related to advanced semiconductors and artificial intelligence technologies.

The issuance of Semiconductors and AI bonds is permitted within the amount approved by the National Diet, similar to Construction Bonds or Special Deficit-Financing Bonds. Their issuance cap is stipulated in the general provisions of the Special Account budget. In addition, similar to Special Deficit-Financing Bonds, there is a system in place for the issuance of bonds in the accounting adjustment term.

Furthermore, regarding Semiconductors and AI Bonds, including their Refunding Bonds, it is stipulated that they will be redeemed by transfer from the Investment Account of the FILP Special Account to Special Accounts for Energy Measures, up to FY 2050.

#### g. Act on Special Accounts, Art. 46 (1) and Art. 47 (1) (Refunding Bonds)

Art. 46 (1) of the "Act on Special Accounts" allows the government to issue Refunding Bonds up to the amount necessary for JGB adjustment or redemption without Diet approval of the issuance ceiling or submission of a redemption plan. The reason is that, unlike new financial resource bonds such as Construction Bonds and Special Deficit-Financing Bonds, the issuance of Refunding Bonds does not lead to an increase in the total amount of outstanding debt. Besides, since circumstances will require that the issuance of Refunding Bonds must occur promptly and flexibly in accordance with financial market conditions, the time constraints associated with the issuance of Refunding Bonds do not allow for procedures such as the advance submission of redemption plans or advance Diet approval of the issuance amount.

In addition, in order to enable flexible issuance in response to financial conditions, Art. 47 (1) allows front-loaded issuance of Refunding Bonds. However, this front-loading is restricted to the ceiling amount stipulated in the general provisions of the Special Account budget approved in advance by the Diet.

#### h. Act on Special Accounts, Art. 62 (1) (Fiscal Investment and Loan Program Bonds)

Along with the 2001 reform of the FILP, Art. 62 (1) of the "Act on Special Accounts" permits the issuance of Fiscal Investment and Loan Program Bonds (FILP Bonds), which are charged to the Fiscal Loan Fund Account, in order to finance the Fiscal Loan Fund operations. According to Art. 62 (2), as the central government issues FILP Bonds based on its credit, an approval from the Diet is necessary on the issuance amount in a similar manner to other JGBs. Art. 62 (3) stipulates that the expenditure schedule must be accompanied by a redemption plan.

#### i. Others (Financing Bills, etc.)

Financing Bills are issued in accordance with Art. 7 of the "Public Finance Act" or the "Act on Special Accounts," etc. Subsidy Bonds are issued in line with their respective condolence money allowance legislations, and specific legislations, such as the Act on Nuclear Damage Compensation and Decommissioning Facilitation Corporation.

#### **B.** Other laws

#### a. Act on National Government Bonds (Basic matters of JGBs)

The "Act on National Government Bonds" defines basic matters of JGBs and stipulates, among others, matters related to bond issuance such as the conditions of JGB issuance and necessary matters concerning debt service, securities certificates, and registration, which are determined by the Minister of Finance. Clerical tasks concerning JGBs are performed by the Bank of Japan; matters concerning the registration of JGBs; matters concerning restrictions on the transfer of JGBs; remedies in cases of the destruction or loss of JGB certificates; and matters concerning the extinctive prescription of JGBs. In relation to matters not stipulated in this law, the Civil Code and the Commercial Code, as well as general rules such as transaction conventions, are applicable.

Specific procedures for the issuance and redemption of JGBs are stipulated in the "Rules Concerning National Government Bonds"; the "Ordinance of the Ministry of Finance on Issuance, etc. of National Government Bonds"; the "Rules for the Handling of National Government Bonds in the Bank of Japan"; and the "Ordinance of the Ministry of Finance Concerning Special Handling Procedures of the Bank of Japan for the Payment, etc., of Principal and Interest of National Government Bonds" among others.

#### b. Act on Special Accounts, Art. 38 through 49 (Redemption of JGBs, etc.)

The redemption of JGBs (payment of principal) and the payment of interest occur through the GDCF established by the "Act on Special Accounts."

The act stipulates the following matters regarding the GDCF: the establishment of the GDCF for the redemption of JGBs including borrowings, redemption resources and transfer methods, the issuance of JGBs (Refunding Bonds) for JGB consolidation and/or redemption, and the successive carry-over of debt redemption cost.
