## **3** Learn about "Income Tax"

## 1 Income Tax

Income tax is imposed on wages, business profits, gains on land sale and other types of incomes. The income tax on an employee's wage is calculated by

- subtracting the employment income exemption from wage income (annual income) to determine the wage income amount,
- ② subtracting **basic, spouse and other exemptions** from the wage income amount to give consideration to the employee's taxpaying capacity and
- ③ applying **the progressive tax rate system** (where higher tax rates are applied to higher income) to the remaining amount.

In this way, income tax can require contribution according to income size and can be fine-tuned according to family structure and other personal circumstances.

## 2 Major Types of Income

There are various types of income, which can be divided into the following ten types of income depending on the nature of the income. In addition, the method of calculating income and the taxation method are determined according to the nature of each income.

Category of income	Description	Taxation method	
Interest income	Income from interest on bonds and savings accounts	Separate withholding taxation at source	
Dividend income	Income from dividends, etc. by corporations	Comprehensive taxatio (filing of return not required), Separate self-assessment taxatio	
Real property income	Income from loans of real estate, ships, aircraft, etc.	Comprehensive taxatio	
Business income	Income arising from business, such as agricultural business, fishing business, manufacturing business, wholesale business, retail business, or service business	Comprehensive taxatio	
Employment income	Income from salaries, bonuses, etc.	Comprehensive taxation	
Retirement income	Income from retirement and other benefits	Separate taxation	
Timber income	Income from the transfer of mountains and/or forests	Separate taxation	
Capital gains income	Income arising from the transfer of assets	Comprehensive taxatio (Note)	
Occasional income	Income arising occasionally which is not income arising from a continuous act carried out for the purpose of profit, and which does not have a nature of compensation for any service such as labor or transfer of assets	Comprehensive taxation	
Miscellaneous income	Income from public pensions and other sources Income that does not fall into any of the above categories	Comprehensive taxatio (Note)	

8

(Note) Some items are treated as separate taxation (income from transfer of stocks, transfer of land, futures trading, etc.).

There are exemptions such as basic exemption which applies to all people and exemptions which take into account individual circumstances such as family structure.

			Income requirement	
		Persons qualifying for deductions	for taxpayers (Total income)

## 4 Changes in Income Tax Contributions

In the past, the highest income tax rate was 70% (for taxable income exceeding 80 million yen), but the rate has been lowered to reduce tax burdens on wage earners. For income from 2015, a new tax rate of 45% was created for taxable income exceeding 40 million yen to **revive income redistribution function of the tax system**.

Income Tax and Solidarity Surcharge (0-5.5% of the income tax) are included for Germany. For France, Income Tax and Social Security-related Contributions (9.7%) are included. When calculating the rate of the burden in each country, only the generally applicable deductions and tax credits are taken into account, so the Earned Income Tax Credit of the US, Working Tax Credit (full benefit) of the UK and similar measures are not considered.

(Remarks) Japanese Currency Exchange Rate: 1 USD = 142 JPY, 1 GBP = 168 JPY, and 1 EUR = 145 JPY (basic exchange rate and arbitrated exchange rate by Bank of Japan: applied in January 2023).
