2

BENIFITS

Operational advantages of having FMIS

WORK IMPLEMENTATION

- a single centralized system, recording at once no separate systems
- automation of accounting records
- automated budget checks
- tracking budgets and transactions
- strengthen budget discipline
- Quick payment via EFT, less F2F
- integrity, accuracy & accountability
- streamline processes and audit log

RESOURCES

- reduce resources consumption, esp. admin tasks
- capacity development with confidence and professionalism in ICT
- enhance the way of work & communication

REPORTS

- operate & generate instantly report from system
- quick access to data and reports, any where & time, as desired, verified & minor errors
- facilitates audit & inspection works

DOCUMENTS & DATA (INFORMATION)

- clear responsibilities, locating & keeping documents
- reduce paperwork, long & secure data storage, easy to locate
- data integration and interfacing with other systems

TECHNOLOGIES

- joint network infrastructure in countrywide for supporting various systems and digital services
- high availability, redundancy, backup and synchronization with security mechanisms

3

WAYS TO SUCCESS

Challenges & the way forward

CHALLENGES

Cooperation

Capacity

Business Process

Laws & Regulations

Human Resources & Encouragement

Unexpected Barrier (Covid)

WAY FORWARD

Automation Processes in FMIS (no Paper)

Additional Functionalities of FMIS (AM, IM & e-GP)

FMIS Sites Expansion to National & Sub-national

Interfacing & Reports Development & Enhancement

Datacenter Capacity & Security Enhancement

THANKS!
